

# packEDGE™

## JD Edwards EnterpriseOne for Food Processing using 9EDGE's Pre-Configured Accelerated Configuration Kit (packEDGE™)

### KEY FEATURES AND BENEFITS

#### Pre-Configured Processes for Accelerated implementation

- Pre-designed and pre-tested processes significantly reduces required time for information gathering, testing, configuring which leads to reduced time needed for implementation activities
- Flexible model can incorporate expanded requirements
- Built on latest release of JD Edwards EnterpriseOne
- Bundle includes five pre-built forms critical for business
- Pre-defined role definition and role level security

#### Well –Defined Methodology for Execution

- Our Result Oriented Methodology (ROM™) ensures timely project delivery
- Pre-designed training and configuration documentation

#### Skilled and Experienced Specialist

- Our employees are experts with packEDGE™ implementation experience.

#### Customer Satisfaction

- Our customer relationships are long term partnerships which help build solid foundations and provide effective results.
- We are the JD Edwards Experts for Food Processing Industry.

### INTRODUCTION

- Need an integrated ERP platform with a seamless transaction flow between your business processes?
- Is your business expanding and overdue for an integrated ERP solution?
- Looking for a top quality JD Edwards ERP partner?
- Want quick ROI for an ERP implementation solution?

packEDGE™ is an accelerated implementation solution using our pre-configured business processes. This bundled solution follows recommended and tested industry-wide best practices for each business process area.

### THE CHALLENGE

#### To have a rapidly implemented, cost effective ERP Solution

- The implementation of ERP is typically a very long process and requires dedication and extended time and effort of the business users
- The cost of implementing an ERP solution is very high
- Valuable in-house team resources are involved for extended periods
- Significant team effort required for configuring, testing and training during ERP implementation
- The ROI of an implementation is delayed

### THE SOLUTION

#### packEDGE™ — A JD Edwards Pre-Configured Accelerated ERP solution for Food Processing incorporating validated Business Processes based on industry-wide best practices

- packEDGE™ rapidly implements **300+ business processes** across Financials, Distribution and Manufacturing modules in 3 months or lower if certain processes are not required
- The packEDGE™ helps in complying to **FDA 21 CFR part 11** regulation
- Following are some of Food and Beverages specific processes which are bundled along with a Pre-designed and pre-tested solution
  - Inventory Traceability through out the supply chain
  - Raw Material Consumption by First expiry
  - Supply chain distribution network planning
  - Quality compliance at each level of production and incoming products
  - Supplier performance Management
  - Product Expiry date management and FIFO inventory movement based on Lot expiry
- Although bundled, packEDGE™ is still flexible! Additional business requirements can be added at additional cost and time.

## ADDITIONAL SERVICES

- Configuration of additional Business Processes
- Implementation of additional Modules
- Development of any additional Forms and Reports
- Configuration of additional Companies or facilities
- Integration to 3rd party software
- Implementation of any new functionality

## RESULTS DELIVERED

- On Time
- On Budget Delivery
- Pre-agreed Results
- Quality
