

packEDGE™

KEY FEATURES AND BENEFITS

Pre-Configured Processes for Accelerated implementation

- Pre-designed and pre-tested processes significantly reduces required time for information gathering, testing, and configuration—reducing implementation activities, time and cost
- Flexible model that can incorporate expanded requirements
- Built on the latest release of JD Edwards EnterpriseOne
- packEDGE™ includes five pre-built forms critical for business operations
- Pre-defined role definition and role level security

Robust Implementation Methodology

- Follows 9EDGE's Result Oriented Methodology (ROM™) to ensure timely project delivery, within budget and with quality
- Pre-designed training and configuration documentation included

Skilled and Experienced Specialists

- 9EDGE employees are trained and experienced in implementing packEDGE™.

Customer Satisfaction

- Our goal is to build long term partnerships with our customers, which is only possible through our commitment to providing effective results.

JD Edwards EnterpriseOne for Industrial Manufacturing using 9EDGE's Pre-Configured Accelerated Configuration Kit (packEDGE™)

INTRODUCTION

- Need an integrated ERP platform with a seamless transaction flow between your business processes?
- Is your business expanding and overdue for an integrated ERP solution?
- Looking for a top quality JD Edwards ERP partner?
- Want quick ROI for an ERP implementation solution?

packEDGE™ is an accelerated implementation solution using our pre-configured business processes. This bundled solution follows recommended and tested industry-wide best practices for each business process area, with focus on the Industrial Manufacturing industry.

THE CHALLENGE

To have a rapidly implemented, cost effective ERP Solution

- The implementation of ERP is typically a very long process and requires dedication and extended time and effort of the business users
- The cost of implementing an ERP solution is very high
- Valuable in-house team resources are involved for extended periods
- Significant team effort required for configuring, testing and training during ERP implementation
- The ROI of an implementation is delayed

THE SOLUTION

packEDGE™ — A JD Edwards Pre-Configured Accelerated ERP solution for the Industrial Manufacturing industry that incorporates validated Business Processes based on industry-wide best practices

- packEDGE™ rapidly implements **300+ business processes** across Financials, Distribution and Manufacturing modules in 3 months or less, depending on the processes required by the business.
- packEDGE™ helps in complying to **FDA 21 CFR part 11** regulations
- packEDGE™ includes some key industrial manufacturing specific processes:
 - Inventory traceability through out the supply chain
 - Raw material consumption by first expiry
 - Supply chain distribution network planning
 - Quality compliance at each level of production
 - Supplier performance management
 - Product expiry date management and FIFO inventory movement based on Lot expiry
- packEDGE™ is a pre-designed and pre-tested solution
- packEDGE™ is bundled and preconfigured to expedite deployment, yet it is flexible enough to enable additional business requirements.

ADDITIONAL SERVICES

- Configuration of additional Business Processes
- Implementation of additional Modules
- Development of any additional Forms and Reports
- Configuration of additional Companies or facilities
- Integration to 3rd party software
- Implementation of any new functionality

RESULTS DELIVERED

- On Time
- On Budget Delivery
- Pre-agreed Results
- Quality
